# GoalSetter App

Your personal goal management companion

Features

- Goal Management: Create, update, and delete your goals easily.
- Firebase Authentication: Securely sign up and log in users.
- Push Notifications: Get reminders for important updates or goal deadlines.
- Custom Dialogs: Beautifully designed popups for goal management.
- Modern UI: Gradient-rich designs built with Jetpack Compose.

Screenshots

Getting Started

1. Clone the repository: `git clone https://github.com/erpankajkumar53/GoalSetter.git`
2. Open the project in Android Studio.
3. Configure Firebase:
   - Go to the Firebase Console and download the `google-services.json` file.
   - Place the file in the `app/` directory.

4. Build and run the app on your device or emulator.

Firebase Integration

Authentication

Supports secure user sign-up, login, and auto-login using Firebase Authentication.

Cloud Messaging

Sends notifications to remind users about important goal updates or deadlines.

Tech Stack

- Kotlin
- Jetpack Compose
- Material3
- ViewModel for state management
- Firebase Authentication
- Firebase Cloud Messaging
